Academic Projects

Title : AgroCart
Platform : J2EE **Duration** : 2 Months
Description : Online Vegetable, fruit and dairy ordering cart type project . This project aims to bridge the gap between farmers who produce organic vegetables and farm products and consumers who value quality, freshness, and sustainability. By utilizing a technology stack comprising MySQL, Spring Boot, and React JS, you can develop a robust and user-friendly platform that offers a seamless experience for customers, while providing farmers with a direct channel to showcase their products and reach a wider audience. Technology Stack as 1) React JS for building interactive user interfaces. 2) Spring Boot for building the backend application and RESTful APIs. 3) MySQL for storing user data, product information, and order details. 4) JWT (JSON Web Tokens) for secure user authentication. 5) Integration with popular payment gateways for processing online payments. 6) A dedicated admin panel to manage users, products, and site content.
